Governmental Regulations and Compliance
Reorganization and Restructuring
Mergers and Acquisitions
Business Process Change
Financial Management-Driven Change

ROADBLOCKS

Technical problems multiplied when new business lines were added. Logistics, rail-to-truck & handling expansion brought new complexity that demanded improved reporting and accountability.

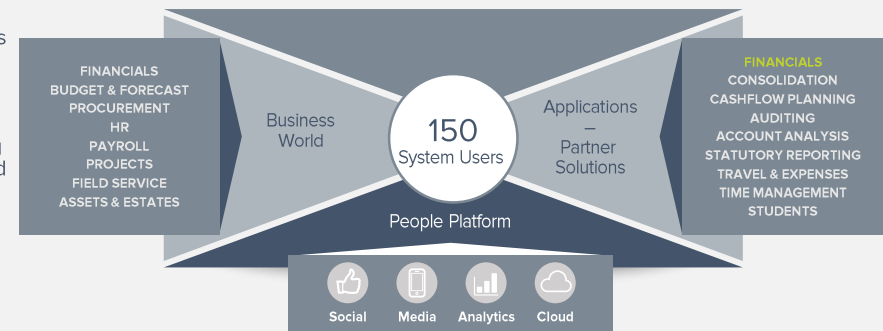

RISKS

Without an inter-operable consolidation engine to track both financial and nonfinancial data in a single, cohesive system, tracking, consolidating analyzing and reporting on new business and profit drivers would be next to impossible.

How did Unit4 help?

Unit4 Financials underpins a competitive start-of-the-art software combination that stokes Superior's ability to drive business and profits from emerging profit lines and has helped the company to move forward confidently into a new era of changing circumstances.

What did we achieve?

Monetary savings

Financials supported annual savings of \$140,000, increased revenue-per-mile of 4% and a \$1.2m increase in income from operations.

Improved operations

Labor-intensive manual processes eliminated, financial closure process cut by the equivalent of 6 man-days a month and staff redeployed from dealing with reporting requests.

Efficiency and governance

Easier identification of higher margin business and a great focus on revenue sources, which contributed to a 0.5% increase in income.
