

Unit4 on Azure Cloud drives 20% increase in productivity at leading healthcare university

Since 1935, Logan University has remained grounded in chiropractic education while continuously enriching academic options with degree offerings in health sciences. Located in Chesterfield, MO, the University has 1,705 students.

INFO
INDUSTRY: Higher Education
SIZE: 1,705 students, 112-acre campus
LOCATION: Chesterfield, MO
PRODUCT: Unit4 Enterprise Resource Planning (ERP)

Achievements

Finance as a business partner
 By eliminating most manual financial transactions, finance can focus on being a partner to business strategy.

People efficiency and cost savings
 Intelligent workflow frees up 20% of finance time and agile Azure Cloud model reduces IT resources by 20%.

Trusted decisions
 Single source of the truth enables faster, more assured, evidence-based decision making.

The Challenge

The University had outgrown an on-premises Microsoft Dynamics GP platform for finance management. The stand-alone system was associated with a large volume of manual processes. Purchase order requisitions, invoices, and other processes remained paper-based. Logan wanted to drive an even more exceptional student experience, which demanded a more agile, flexible, and automated system.

“Availability is first class and the performance is excellent. The one question we ask ourselves is, ‘Why didn’t we do this earlier?’”

Lejla Tica, Programmer, Logan University

How did Unit4 help?

<ul style="list-style-type: none"> Powerful Unit4 Financial Management function comprises accounts payables, receivables, and requisitioning. Unit4 ERP has been proven countless times in higher education, 	<ul style="list-style-type: none"> offering almost limitless automation. People can connect from anywhere.
