

## Unit4 ERP Operational Agility and Intelligence

# Enhance strategic decisions and responsive change

**Unit4 ERP is an adaptable and easy-to-use suite of capabilities built to help service-centric organizations improve their productivity, resilience, and ability to adapt at speed.**

**Underlying this suite is an architecture that empowers operational agility and robust business intelligence and reporting.**

In these times of increased complexity and disruption, access to the right data to make business-critical decisions is essential for organizations to adapt their operations effectively. They should not be blocked by information systems that cannot provide the right intelligence or a solution that can't adapt to changes at a fast-enough rate.

Unit4 ERP's operation and intelligence capabilities' power is its unique combination of a flexible data structure overlaying powerful reporting tools. The system empowers changes to be made without technical expertise and provides an enhanced and intuitive user experience for your people on a continually evolving solution.

The adaptability baked into Unit4 ERP through its unique architecture means the right reports are generated, and operational changes are made simple with automatically updating workflows, data access and security.

Sophisticated tooling and data visualization let you present the most up-to-date data in the most appropriate and digestible format for your stakeholders.

Quickly adapt data structures and workflow processes, and add additional data fields with ease with no disruption to existing data. The solution automates changes consistently across the organization, so end-users are driven to input data accurately and consistently.

Ensure your organization has the right tools to generate essential business intelligence for effective working and strategic decision making, and the flexibility to make the right changes when needed.

## What are Unit4 ERP’s operational intelligence and reporting capabilities?

### Real-time data visualization

Make reporting easy to understand, present to stakeholders and share with external applications. Easily analyze and present real-time data in visual form to provide the most up-to-date business picture. It can be easily formatted for different stakeholders or visualized as a timeline to analyze trends.

### Visually represent and adjust organizational structures

Adapt any organizational structure quickly with an easy-to-use drag and drop functionality. Make changes in one click that are reflected across the organization.

### Simplify data entry and create alerts

Make your people’s lives easier with dynamic and consistent data capture to eliminate inconsistencies and save time. Create alerts to prevent errors, ensure all necessary data is added and react to triggers – served through common communication tools such as Microsoft Teams or Slack.

### Enhanced communication

Provides enhanced chat functionality assigned to a specific ERP process to enable better collaboration and easy internal sharing of tips and tricks.

### Personalized dashboards

Tailor specific dashboards per user profile so your people can see and interact with all the information they need in one place. All presented in an intuitive format that eliminates the need to search through menus. And simplified mini-apps for 10-second interactions also speed-up admin tasks.

### Extend data fields and deep dive with ease

Access real-time detail behind the numbers and save time on searching for further information. With a flexible data model and archiving system that can be easily extended with new fields, Unit4 ERP can be your single source of truth.

### Adjust processes and assign tasks

Easily create business processes that can be governed and evolved as business circumstances change. Group, assign and share tasks for efficient tracking, faster follow-up, and increased collaboration.

### Maintain compliance

Data is tracked and visible only to authorized users to improve compliance and user experience. Data audit trails are stored automatically.

### Easy release of new ERP features

Unit4 ERP enables easier implementation of new capabilities into the system, saving time, costs and enhancing the quality of set-up. Now your ERP can evolve as your business needs change.

## Unit4 ERP

**Unit4 ERP’s strengths are multiplied when used as a fully integrated solution.**

**Unit4 ERP incorporates increased visibility and control in the following functions:**

- Financial Management
- Project Management
- Procurement
