1. Introduction

Unit4 Financials SaaS delivers superior efficiency, consistency and accuracy to help your organization thrive amid the digital revolution. With business models transforming, new regulations emerging and change coming faster than ever, Unit4 Financials helps you handle the most complex challenges with confidence.

Unit4 Financials SaaS provides the original unified-ledger, global accounting system that gives your organization a single, real-time version of the truth. Embrace the best-of-breed financial solution that integrates with your existing systems for total freedom of choice and ongoing business agility.

The purpose of this Unit4 Financials Service Description is to describe the cloud Service composition provided to the Customer.

Unit4 provides a complete technically-managed solution for Unit4 Financials SaaS deployed in the public cloud. This end-to-end Service includes infrastructure, hardware, system software, monitoring, management and maintenance of the entire solution (including backups), disaster recovery and Service updates.

Unit4 offers cloud enterprise solutions as Unit4 SaaS - a Software as a Service delivery model deployed on Microsoft Azure. This model leverages Microsoft Azure's scale and experience of running highly secure and compliant cloud Services around the globe. Microsoft Azure's infrastructure is second to none in terms of physical and electronic security, and it adheres to industry standards such as ISO 27001, SOC 1 & 2, PCI DSS and many more.

Unit4 Financials is available as a shared option, where compute resources are shared between Customers without any interference and a dedicated option where compute resources such as the web server and SQL server, are dedicated to a single Customer.

In summary, Unit4 provides the following:

- Access to Unit4 Financials Web Client and API/web services;
- All User access to Unit4 Financials SaaS is over secure internet connections (HTTPS). A variety of browsers and mobile platforms are supported;
- Comprehensive integration options available, including the use of Unit4 APIs/web services, batch file-based interfacing and direct read-only access to replicated production database;
- Infrastructure is fully scalable, in a high availability environment with redundancy in critical aspects such as power, hardware, network communications;
- Relevant security level;
- Continuous monitoring is in place, covering servers, Services and applications, feeding alerts and continuous improvement;
- Application of infrastructure updates, patches and hot fixes;
- Unit4 software and supporting software Releases, Updates and Hot Fixes;
- Production Environment and Non-Production Environments with a separate database for Customer's data;
- Forgiveness restores (where applicable), and disaster recovery in a physically separate secondary site;
- Service Level Agreement, with Service Credits based on Service Availability;

- Unit4 Community (aka Community4U) to engage with Unit4 directly, giving insight in the Service performance indicators and see the status of the Service;
- Various Azure regions leveraged to enable Unit4 to meet Customer's data residency needs; Customer's data always resides within a specified geopolitical zone (except where explicitly stated otherwise);
- Formal policies in place for: information security, data processing, disaster recovery, business continuity and acceptable / fair use.

2. Data centers & data residency

Unit4 uses the Microsoft Azure infrastructure and platform Services, to deliver the Unit4 Financials SaaS. These Services are delivered from within different geopolitical zones, using a primary and a secondary location in every zone to meet Service level commitments and disaster recovery needs. The location within each geopolitical zone is at the discretion of Unit4 and can change from time to time. The table below contains details of the geopolitical zones, along with the data center locations. For more information, see Azure region details: azure.microsoft.com/regions.

| Geopolitical zone | Provider | Data location (Countries/City's/Regions) | Time zone |
|-------------------|-----------------|---|-----------|
| EU | Microsoft Azure | Dublin, Ireland and Amsterdam (DR), Netherlands | CET/CEST |
| USA | Microsoft Azure | Texas and Iowa (DR) | CST/CDT |
| Canada | Microsoft Azure | Quebec City and Toronto (DR) | EST/EDT |
| United Kingdom | Microsoft Azure | London and Cardiff (DR) | GMT/BST |
| Asia | Microsoft Azure | Singapore and Hong Kong (DR) | SGT |
| Australia | Microsoft Azure | Victoria and New South Wales (DR) | AEDT/AEST |
| Norway | Microsoft Azure | Stavanger and Oslo (DR TBD) | CET/CEST |

Unless agreed otherwise in an Order Form the chosen deployment of the Customer will be as follows:

| Customer residence | Geopolitical zone used | Available solutions |
|-----------------------|------------------------|---------------------|
| APAC | Asia | All |
| Australia/New Zealand | Australia | All |
| Canada | Canada – Azure | All |
| EU | EU – Azure | All |
| Norway/ Denmark | Norway – Azure | All |
| UK | UK – Azure | All |
| US | US – Azure | All |

In the unlikely event the primary and secondary redundancy of the network in a geopolitical zone fails, connections are rerouted using tertiary redundancy in the following way.

| Primary | Secondary | Tertiary |
|-----------------------------|-----------------------------|-----------------------------|
| Geopolitical zone EU | Geopolitical zone EU | Geopolitical zone UK |
| Geopolitical zone UK | Geopolitical zone UK | Geopolitical zone EU |
| Geopolitical zone USA | Geopolitical zone USA | Geopolitical zone Canada |
| Geopolitical zone Canada | Geopolitical zone Canada | None |
| Geopolitical zone Asia | Geopolitical zone Asia | Geopolitical zone Australia |
| Geopolitical zone Australia | Geopolitical zone Australia | Geopolitical zone Asia |
| Geopolitical zone Norway | Geopolitical zone Norway | TBD |

3. Service model

Unit4 Financials is available in 2 main models:

1. in a shared deployment model; and
2. in a dedicated deployment model.

Unit4 Financials dedicated model provides the same Service offering as the shared model with the distinction that computing resources such as the web server and SQL server are not shared with other Unit4 Customers, and are dedicated to a single Customer. The dedicated deployment option is not available for the Unit4 People Platform Services, these are always shared (Unit4 People Platform Services are Multi-Tenant).

Please note that not all models are available for all solutions and/or data centres. In summary form the characteristics of each of these models is as per table below:

| Category | Component | Shared | Dedicated |
|----------------|---|---|------------------------|
| SOLUTION | Release | Commence automatically | Commence automatically |
| | All patching, updates of the standard solution (technical) | Included and automatic | Included and automatic |
| INFRASTRUCTURE | Environments included | 1 Production + 2 Non-Production (Preview and Acceptance) ¹ | |
| | Availability guarantee | Yes | Yes |
| | Response time guarantee | None | None |
| | Dedicated deployment | No | Yes |
| | VPN | Yes (DB replica access only) | Yes |
| SERVICES | Releases will commence | Automatically | Automatically |
| | On-going technical operations, performance management, maintenance of all infrastructure components, monitoring alert response and issue resolution | Yes | Yes |

¹ Three (3) environments set up is a new standard applicable to Customers that got their Agreements signed with effect from May 2020.

| | | | |
|--|--|-----|-----|
| | Backup & Service Restore | Yes | Yes |
| | Disaster recovery | Yes | Yes |
| | Monitoring program of infrastructure and application | Yes | Yes |

4. Environments

Three (3) environments are provided², including:

- One Production Environment (PE) called alternatively “live” environment, being the environment that the Customer uses to run the day to day (live) operation; and
- Two Non-Production Environments (NPEs):
 - Preview – a Customer's Preview environment always contains the latest updates for the Unit4 Product in use by the Customer;
 - Acceptance – which can be used according to Customer needs as “Test” / “Quality” / “Development” / “Pre-Production”.

Additional environments can be provided at an extra charge.

People Platform Services

Unit4 People Platform Services are Multi-Tenant, shared Services. Except where explicitly stated in the Service’s Service Description, each Unit4 People Platform Service has a Preview instance and a Production instance; there is no concept of Customer specific instances of Unit4 People Platform Services. As such, no additional instances of Unit4 People Platform Services are provided.

4.1 Production Environments

Only the Production Environment (PE) is subject to the Service Level Agreement.

4.2 Non-Production Environments Characteristics

Although a Non-Production Environment (NPE) is not subject to the SLA, NPEs have some characteristics as described below.

Definition of an NPE refresh from or to PE

A refresh of an NPE from PE encompasses:

- The restore of transactional database(s);
- The restore of non-transaction data store;

² Three (3) environments set up is a new standard applicable to Customers that got their Agreements signed with effect from May 2020.

- Copy of most recent 90 days of documents or the most recent 2GB of documents, whichever results in greater amount of documents (blob store);
- Custom report templates (e.g. Purchase order template, invoice template, etc.);
- Customisations;
- Report output from last 90 days;
- There is no NPE refresh option for Unit4 People Platform Services.

Point in time used

The NPE refresh is from a point in time prior to the current Business Day. The specific point in time is selected by Unit4.

Frequency of NPE refresh from or to PE

Where the PE and NPE environment are at the same Release level or at the different Release levels, one refresh per NPE per month is included.

Additional requests will give an extra charge per refresh per NPE.

How to request a refresh?

Refreshes must be submitted to Unit4 by a Named Support Contact using a Service Request on Unit4 Community4U.

Throughput time

A NPE refresh from PE will be available for use at the start of the second Business Day following the Service Request acceptance (depends on the contracted support level).

Users accessing an NPE

NPEs are configured to handle a maximum of 15 concurrent Users.

Customer responsibilities

Customer needs to manage non-production WIP such as non-production report templates (e.g. in progress changes to purchase order report template) as refresh will replace WIP with copies from production.

What happens to the previous NPE details after a refresh?

Everything in NPE will be erased and replaced with a fresh copy from PE; same reports as in PE, same data as in PE, etc.

Update of an NPE to a new Update

The Preview (NPE) environment is updated as soon as an Update is available following an announcement of Unit4.

Once an NPE has been updated to the latest Update, it is not possible to move back to the previous Update.

Backups

Backups of NPE are made daily in the time zone of the geopolitical zone in use. Backups of NPE are kept for fourteen (14) calendar days.

Restores

A restore request can be made by issuing a Service Request on Unit4 Community4U. Throughput time, amount of included restores and the charge is same to a refresh of an NPE. Please note there is no Customer specific restore option for Unit4 People Platform Services.

5. Reporting and monitoring

5.1 Reporting on Service Performance

Unit4 provides operational information regarding Unit4 Financials SaaS on Unit4 Community4U. That information includes:

- Service Availability;
- Scheduled maintenance (times, dates per region);
- Release information and deployment schedules;
- Incidents overview;
- Site recovery status (in the event of the disaster plan initiation).

5.2 Monitoring program

A continuous 24x7x52 monitoring and resolution program is in place to detect and resolve incidents to meet Unit4 Service Availability targets on Production Environment.

6. Releases and Updates

Periodically, Unit4 introduces new features in the Unit4 Financials SaaS including enhanced features and functionality across applications. Features and functionality will be made available as part of a Release. As part of regular maintenance Unit4 will apply Updates and Hot Fixes, as deemed necessary by Unit4 in order to maintain the existing features of the Service and to maintain Service level commitments and security.

Releases and Updates will be provided free of charge as part of the Service. However, it should be noted:

- Any Releases or Updates may result in additional Configuration and/or functional adjustments that are required to be made by either: (i) the Customer; (ii) Unit4; or (iii) approved Service partner consultants, which are not included in Unit4 Financials SaaS and will be a subject to additional charges.
- Where any Release or Update replaces or updates any Customisation or non-standard functionality utilised by Customer, the Customer will be required to adopt the standard functionality. Unit4 reserves the right to charge a reasonable fee to provide assistance if Customer wishes to maintain the previous Customisation or non-standard functionality.

6.1 Release deployment

Releases may take place approximately twice per year. The frequency of Releases may be increased or decreased at Unit4's discretion. Releases may take up to twelve (12) hours to deploy, resulting in the Service being unavailable for some or all of that time (such unavailability shall not be counted as Service downtime for the calculation of Service

Availability). A schedule of planned deployment of Releases to the Production Environment will be published on the Unit4 Community4U. A Customer's Preview environment always contains the latest updates of Unit4 Financials SaaS in use by the Customer. Unit4 will use reasonable endeavours to ensure that Releases will be carried out during the Planned Maintenance window.

The availability of new Releases will be published on the Unit4 Community4U. For Releases the Preview environment is updated first. On Customer's request and approval, promotion to the Production Environment will take place.

[APPLICABLE FOR UNIT4 PEOPLE PLATFORM SERVICES]

Given the foundational nature of the Unit4 People Platform Services, Releases of Unit4 People Platform Services occur more frequently than end User facing aspects of Unit4 business solutions. Unit4 People Platform Service Releases are deployed in a transparent manner and result in no downtime. As such, Unit4 People Platform Service Releases can be deployed outside of Planned Maintenance windows. In rare cases when downtime is necessary, the Release will be performed during a Planned Maintenance window. Details regarding changes contained in a Unit4 People Platform Service Release can be found on the Unit4 Community4U as soon as the Release has been deployed. Releases of Unit4 People Platform Services cannot be deferred.

6.2 Update Deployment

Updates are applied as deemed necessary by Unit4 in order to maintain the existing features of the Unit4 Financials SaaS as well as maintaining Service level commitments and security.

An Update calendar per Geopolitical zone will be released at least 4 weeks before an Update commences on preview. The Production Environment will follow no sooner than 9 weeks after the Update announcement. Updates are not capable of being deferred.

Please note there is no concept of an Update to Unit4 People Platform Services. All changes to a Unit4 People Platform Service are considered a Release of the Service.

6.3 Hot Fix Deployment

Hot Fixes are applied as deemed necessary by Unit4 in order to maintain the existing features of the Unit4 Financials SaaS as well as maintaining Service level commitments and security.

Please note there is no concept of Hot Fix to Unit4 People Platform Services. All changes to a Unit4 People Platform Service are considered a Release of the Service.

7. Planned and Unplanned maintenance

7.1 Planned Maintenance

Planned Maintenance windows are dedicated to apply all the respective changes to the Service provided e.g. updates, hot-fixes and Releases. During Planned Maintenance Production Service may be periodically unavailable. You can find more details on schedule presented in the table below:

| | Standard Planned Maintenance windows (PMW) <i>Releases and Infrastructure</i> | Additional Planned Maintenance windows (PMW) <i>Releases</i> |
|---|--|--|
| All regions (except Azure US, Azure Canada) | 12 per year, 3 rd or 4 th week of each month From: Sat 4PM To: Sun 4AM UTC | |
| Regions Azure US and Azure Canada | 12 per year, 3 rd or 4 th week of each month Shortened PMW: From: Sun 4AM To: Sun 11AM UTC Or Full PMW*: From: Sat 11PM To: Sun 11AM UTC <i>*In rare cases, when a downtime of all regions would be required</i> | 2 per year according to time interval specific for given region <i>(unless communicated otherwise)</i> |

Planned Maintenance windows are subject to change upon reasonable notice. The exact dates of Planned Maintenance windows are communicated on Unit4 Community4U.

If actual downtime for scheduled or planned maintenance exceeds the time allotted for Planned Maintenance, it is considered part of the calculation for Service Outage. If actual downtime for scheduled or planned maintenance is less than time allotted for Planned Maintenance, that time is not applied as a credit to offset any Service Outage time for the month.

Planned Maintenance can also be carried out by Unit4 provided that the Customer has received at least 8 hours' notice. This will occur in unforeseen or exceptional circumstances only (similar to emergency / Unplanned Preventative Maintenance) to deal with a vital or critical issue and Unit4 will use its reasonable endeavours to do this outside Business Hours to cause minimal disruption to the Customer. In this case, because Unit4 provides Customer 8 hours' notice, this maintenance does not count as Service Outage. This is so that Unit4 is not encouraged to wait until the next Planned Maintenance window to deal with an urgent issue and avoid a Service Credit.

7.2 Unplanned Preventative Maintenance

Unit4 may carry out Unplanned Preventative Maintenance if there is an urgent requirement to secure the stability of, or the security of Unit4 Financials SaaS. This action may be taken at the discretion of Unit4 for unforeseen and exceptional circumstances, which require immediate resolution that cannot wait until the next Planned Maintenance window. Unplanned Preventative Maintenance is counted as a Service Outage.

8. Customer permissions and responsibilities

8.1 Customer permissions

Customer has the right to:

- 1) Monitor PE availability and Service Response Time on an active basis using a third-party monitoring Service. Monitoring acts as a consumer of Unit4 Financials SaaS and is subject to any and all present and future Usage Restrictions of Unit4 Financials SaaS. Customer and Unit4 must agree, prior to monitoring, on monitoring details in order to ensure that the monitoring does not interfere with the Unit4 Financials SaaS offering and that Unit4 security tooling does not block the monitoring Service.
- 2) Conduct an external security vulnerability scan on an annual basis. Details of the planned scan must be provided to Unit4 at least 30 days in advance of each scan using a Service Request.
- 3) Conduct a security penetration test on an annual basis. Details of the planned test must be provided to Unit4 at least 30 days in advance of each test, using a Service Request.

Any activities to prepare, coordinate or manage the above by Unit4 is subject to additional charges.

8.2 Customer Responsibilities

Release and Service Updates

The following list summarizes typical Release and/or Update tasks and indicates Services included as part of Unit4 Financials SaaS and tasks that are the responsibility of the Customer (or by Unit4 Professional Services at an extra charge):

| Task | Included | Customer Responsibility |
|---|----------|-------------------------|
| Project Planning | | |
| <ul style="list-style-type: none">• Publishing general availability schedule of Releases on the Unit4 Community4U | ✓ | |
| <ul style="list-style-type: none">• Managing timelines, outline goals, roles and responsibilities | | ✓ |
| <ul style="list-style-type: none">• Business analysis and discovery | | ✓ |
| <ul style="list-style-type: none">• Creating test plans | | ✓ |

| Release deployment in Preview environment | | |
|---|---|---|
| • Update Preview environment with Release | ✓ | |
| • User training on changes | | ✓ |
| • Test: conducting basic Release testing | | ✓ |
| • Training support to assist with testing | | ✓ |
| • Functional and User acceptance testing as desired | | ✓ |
| • Training, implementation and Configuration for new features | | ✓ |
| • Uplift and testing of all Customisations | | ✓ |
| • Reviewing test scripts and testing outcome for issues resolution | | ✓ |
| • Go/No-go criteria's and agreement on Production Release deployment timing | | ✓ |
| Release deployment in Production | | |
| • Update existing application Configuration, being all activities undertaken to set up application provided by the Service which involve the use of standard menus and functionality. There may be rare cases where it is not technically possible to determine the correct business Configuration; in these rare cases any tasks that must be completed manually are the responsibility of the Customer. | ✓ | ✓ |
| • Update Production Environment with Release | ✓ | ✓ |

Customisation update responsibilities

Unless agreed otherwise, Customer responsibilities include Customisation code lift and testing for compatibility, functional testing and any application (re)Configuration.

Unless agreed otherwise, any Customisations that are not updated to run on the current Release (n) in time for the production Release or Service Update deployment will be disabled in the Production Environment prior to Release deployment.

Technical & functional responsibilities

Technical Environment responsibilities:

- Supply, administration and maintenance of Customer-side client devices and local printers;
- Customer-side networking infrastructure, including connectivity to the internet;
- Security of Customer-side network, devices and internet connectivity;
- Ensuring sufficient bandwidth, including internet bandwidth;
- End-to-end ownership of conducting penetration tests, any security checks, as well as Customer owned monitoring.

Functional Environment responsibilities:

- Customer is fully responsible for the Configuration and administration of the functional aspects of the Service, including User and role administration.

8.3 Customer Obligations

Account Set-up

Customer is responsible for designating its Users, and for ensuring that all Users are adequately trained and understand Customer's remote access and use obligations and requirement to comply with Unit4's acceptable use policy (www.unit4.com/terms). Where applicable each individual User must establish an Account. Customer is responsible for managing its Accounts and disabling a User's Account when Unit4 Financials SaaS access is no longer required, including immediately upon termination of such User's affiliation with Customer. Customer is responsible for its Users' acts and omissions and for all activities occurring under its Users' Accounts.

Account Administrator

Customer will designate one or more Account Administrator(s). The Account Administrator(s) responsibilities include, but are not limited to, coordinating with Unit4 regarding the Service and managing Customer's Accounts. Customer warrants that its Account Administrator(s) will maintain authority to act on Customer's behalf concerning the Unit4 Financials SaaS, and that Unit4 can rely on the Account Administrator(s) actions and instructions in connection therewith.

Account Security

Each User is responsible for keeping his or her Account credentials confidential. Users may not share Account credentials, and Customer may not recycle Account credentials when activating or disabling Accounts. Customer will notify Unit4 immediately upon discovering any known or suspected unauthorized access to, misuse of, or breach of security in Unit4 Financials SaaS or its Users' Accounts, and will provide all information and take all steps requested by Unit4.

9. Partner / third party products

Partner or third-party products are not delivered as part of the Service. These products should run on third-party infrastructure managed by the vendor, Customer or a third-party at discretion of the Customer, except for such products that have explicitly been certified by Unit4.

Certified products³:

- Crescendo by Interstaff - setup and support by Unit4 for supported versions of Crescendo.

10. Localisations

The Service includes Localisations developed for our key strategic territories and verticals, securing legal, statutory and market standard requirements. Customer ordered Localisations will be made available to the Customer in the next available maintenance window. The Localisations available depend on the Customer's home country and the version of Unit4 Financials product. An overview of all available Localisations can be found below.

10.1 Localisations by Unit4 Financials R&D

Localisations developed and/or maintained by Unit4 Financials R&D are permitted as standard, and include the following:

| Code | Name | Country | Description | Ownership |
|----------|---------------------------|-------------|---|----------------------|
| nlcommon | Common Extensions NL | Netherlands | Common extensions for NL customisations | Unit4 Financials R&D |
| nladvpay | Advanced Payments | Netherlands | Advanced Payments | Unit4 Financials R&D |
| nlintbal | Intray Balances | Netherlands | Intray Balances | Unit4 Financials R&D |
| nlperass | Period Assistant | Netherlands | Period assistant | Unit4 Financials R&D |
| nlstufbg | StUFBG Integration | Netherlands | StUF BG Integration | Unit4 Financials R&D |
| nltranal | Transaction Allocation | Netherlands | Transaction allocation | Unit4 Financials R&D |
| nlcolfee | Collection Fees | Netherlands | Collection Fees | Unit4 Financials R&D |
| nlscanim | Scan Import | Netherlands | Scan Import | Unit4 Financials R&D |
| nldocrep | Document Repeater | Netherlands | Document Repeater | Unit4 Financials R&D |
| beivatin | iVAT Reporter Integration | Netherlands | iVAT Reporter Integration | Unit4 Financials R&D |

³ List to be provided and updated on a regular basis.

| | | | | |
|------------|--------------------------|-------------|--|----------------------|
| nremhis | Reminder History | Netherlands | Reminder History | Unit4 Financials R&D |
| einvoicing | E invoicing ⁴ | Netherlands | E invoicing | Unit4 Financials R&D |
| cis | CIS ⁵ | UK | Construction Industry Scheme | Unit4 Financials R&D |
| deelster | ELSTER ⁶ | Germany | Produce Files for German tax authority | Unit4 Financials R&D |

10.2 Localisations by third party or Unit4 Professional Services

Localisations developed by third-party, partners or Unit4 Professional Services that have been reviewed in accordance to the Localisations review criteria are permitted, and include the following:

Benelux

| Code | Name | Description | Ownership |
|----------------|-----------------------------------|--|-------------------------------------|
| nlassetudf | Assets-UserExtensions | Provides values for User Defined Fields in Assets | Unit4 Benelux Professional Services |
| nlnotifypimusr | GLS_Notification-01.001.006-14000 | Sends notifications to Users when assigning an invoice to another User in Invoice Matching | Unit4 Benelux Professional Services |
| nlattachinv | Sales Invoices | Attaching Sales invoices from billing to Financials | Unit4 Benelux Professional Services |

France

| Code | Name | Description | Ownership |
|----------------|--------------------|---|------------------------------------|
| frstmloader120 | StmLoader (AFB120) | AFB120 bank statement format loading into statement table. NB: A shared FTPS folder will be used to securely upload the statement files from the client network | Unit4 France Professional Services |
| frexportdata | ExportData | Produces the FEC file for French authorities: NB: a | Unit4 France Professional Services |

⁴ Currently available for Unit4 Financials version 14

⁵ Currently available for Unit4 Financials version 14

⁶ Not compatible with Unit4 Identity Services

| | | | |
|----------------|------------------------------------|---|------------------------------------|
| | | dedicated Uri will be provided to download each file via HTTPS access - FTPS could also be used to retrieve files | |
| fribanbankctrl | IBAN control CTRLBankAcc | IBAN and bank account format validation: | Unit4 France Professional Services |

Germany

| Code | Name | Description | Ownership |
|----------|---------------------|---------------------------|----------------------|
| debstpay | BSTPay ⁷ | Bank statement processing | Partner : 2Opus GmbH |

11. Customisations, integrations, custom reports and fields

Customisations, custom reports and integrations are permitted in Unit4 Financials SaaS and can be written by Unit4, Unit4 partners or the Customer. Maintenance, support, implementation and update considerations for these custom components are not included in the Service fee. Customisations are not supported by Unit4 under Standard Support. The Customer has sole responsibility for the Customisations, custom reports and integrations, as well as their maintenance and Unit4 has no responsibility to maintain compatibility or fix any problems resulting from the use of non-standard software. This includes any custom development or Customisation (including Unit4 delivered Customisation as part of a project implementation, bespoke code written by Unit4). If any assistance is required in regard to Customisations and/or bespoke work, Unit4 may be able to assist with resolving issues or with upgrades of the Customisation, but this will be subject to review and extra charge. Customer will be required to purchase Professional Services at Unit4's Prevailing Rates.

Any Customisation can connect to the Unit4 Financials Service using Unit4 Financials API, but they require Customer or third-party vendor hosting, implementation, support and maintenance. Note: Unit4 Financials Integration Tool Kit (ITK) processes are considered standard product.

11.1 Unit4 Created Customisations

Maintenance of Unit4 authored or created Customisations, including custom entities, fields, relationships, screens, reports, imports, exports, workflows, interaction plans, lookup data, localisation files, C# / Java /etc. code, database views, web styles and scripts, are outside the

⁷ Currently available for Unit4 Financials version 14

scope of Unit4 Financials SaaS offerings. Maintenance, support, implementation and update considerations for these components are not included in the Service fees.

11.2 Restrictions in Customisations

In general, there are restrictions regarding allowing Customisations in Unit4 Financials SaaS including but not limited to:

- no third-party applications/DLL installed;
- no direct access to local resources such as file system, network, etc., access must be indirect via approved methods that provide abstraction from specific infrastructure;
- all Customisations must be delivered fully documented;
- any code needs to be transparent and readable delivered to Unit4;
- all Customisations must include installation routines that require no manual interaction and allow for end Users to validate installation has been completed and the Customisation ready for Configuration or use via standard application capabilities.

11.3 Customisation review process

Unit4 reserves the right to review all Customisations submitted by Customers in order to protect the security, stability and performance of the Services. In such event Unit4 may ask for the source code of the Customisation in order to assess the risk to the stability, security and/or performance of the Service. In case Unit4 identifies a reasonable concern Unit4 reserves the right to reject the Customisation.

Examples:

- Non-standard database objects (tables, views, triggers, stored procedures etc.);
- User extensions;
- Any programs/routines running on the application server.

11.4 Unit4 APIs backward compatibility

Unit4 recommends using the most recent version of the Unit4 APIs in order to receive optimum performance and stability. Prior versions of Unit4 APIs are updated to support backward compatibility for all prior versions of Unit4s APIs that have not reached an end-of-life status. End-of-life announcements will be made not less than eighteen (18) months before the end-of-life of each Unit4 API.

11.5 Integrations

Integrations are defined as any type of interaction with Unit4 Financials that are not classified as above defined Customisations. Integrations are permitted according to the supported integration methods described below. Integration methods not explicitly stated below are not permitted.

| Integration Type | Permitted? |
|--|------------|
| Integration using Unit4 Financials API/web services | ✓ |
| Unit4 Financials Integration Tool Kit (ITK) integrations | ✓ |

| | |
|---|--|
| Integration using standard export/import files over SFTP | ✓ |
| Integration requiring read-only direct database access ⁸ | Additional Service offering - Direct database access |

11.6 Maintenance of Customisations, Custom Reports and integrations

- Maintenance, support, implementation and update considerations for these components is not included in the Unit4 Global Cloud subscription fee except for Unit4 Financials R&D maintained Customisations listed above.
- Customer or Unit4 partner authored Customisations, ITK processes, custom reports and integrations are the full responsibility of the Customer for all aspects of deployment and maintenance. Customer responsibilities include code lift for release version compatibility, functional testing and Configuration and error resolution.
- Unit4 Professional Services authored Customisations, ITK processes, custom reports and integrations are outside the scope of for Unit4 Financials SaaS. Maintenance of Customisations, custom reports and integrations must be formally set up and included on an executed Order form to ensure that Unit4 takes responsibility. If Unit4 maintenance of Customisations, custom reports and integrations has not been included on an executed Order form, responsibility for all aspects of deployment and maintenance will reside with the Customer.

12. Technical operations

12.1 Printing

All printing is carried out on the client side.

12.2 Direct database access

Direct database access can be provided, against additional recurring costs, to a replicated read-only database, as described below. This additional Service is not available for People Platform Services and will come at an additional cost:

- A copy of the Customer's transactional database, with a limited set of tables will be made available via one database connection (via TCP/IP TDS endpoint) with read-only access, with one set of database User credentials;
- Customer can request for specific tables/views to be replicated. Any change of the database definition for the custom objects may result in the replication process failure. In such an event Customer will have to request via Service Request to reinitiate the replication process;
- Replication process may require to be reinitiated after software upgrades/software updates

⁸ Direct database read-only access is not included in the standard offering. See "Direct database access".

- The database connection must be made from the Customer-provided application or system running outside of the Unit4 Cloud Service operating environment;
- The copy will be refreshed no less frequently than every 15 mins. Meaning the data will be no older than 15 mins as compared to the source transactional database;
- Any of the Customer's environments are candidates for this option and each has an additional cost.

Customer responsibilities for the direct database access additional Service offering include:

- Customer side networking;
- Establishing secure database connections and ensuring data privacy;
- Establishing, monitoring and managing any integrations or other consumption of the database connection;
- Licensing, operating and installing in the Customer's IT infrastructure any applications that consume the direct database access connection.

12.3 Connectivity

Access to the Web Client is delivered over the public internet using an HTTPS connection (RSA 2048 bits - SHA256 with RSA and/or EC 256 bits SHA256 with ECDSA).

A VPN connection (IPsec) can be provided as an option against recurring additional costs.

Internet bandwidth suggestions

The web browser will use 12 to 20 Kbps per User unless large graphics are used.

Virtual Private Network

Unit4 can provide an optional VPN (IPsec) connection as an option.

Client device terminating the VPN connection has to fulfil following requirements:

- Be on the list of supported hardware for RouteBased VPN: <https://docs.microsoft.com/en-us/azure/vpn-gateway/vpn-gateway-about-vpn-devices>;
- Support Network Address Translation (NAT) to limit the networks on Customer side to one network with maximum 24-bit mask;
- Provide, at minimum, support for VPN settings listed below:

| IKE version | IKE v2 |
|------------------------------------|-----------------|
| IPSec Keying Mode | PSK |
| IKE Phase 1 – Encryption Algorithm | AES 256 |
| IKE Phase 1 - Authentication | SHA 256 |
| IKE Phase 1 – DH Group | At minimum DH14 |
| IPSec Phase 2 – Encryption | AES 256 |
| IPSec Phase 2- Authentication | SHA 256 |

12.4 Authentication

By default, authentication for Unit4 Financials (Web Client) is carried out using application-based username and password authentication. Management of Users and passwords within the Unit4 Financials application is the responsibility of the Customer.

The Unit4 Cloud Services have capabilities for federated authentication to allow Customers' Users to use their organizational credentials (e.g. domain username and password) when logging in to an Unit4 application using a web browser (web access). With federated authentication, the Customer's authentication provider (e.g. ADFS, Azure Active Directory, etc.) performs authentication instead of an application-specific username and password that is validated by the Unit4 application.

In order to use federated authentication there is an optional Service called Unit4 Identity Services or Unit4 IDS. Unit4 IDS is a Multi-Tenant identity solution and architecture for the Unit4 ecosystem, that allows Users to have one single identity across multiple applications and provides a single sign-on experience. In order to benefit from Unit4 IDS Customers are required to be at least on version Unit4 Financials 14. More details about Unit4 IDS can be found in Unit4 IDS Service Description at www.unit4.com/terms.

The Customer is responsible for Configuration of their identity provider (IdP) and to provide specific information (required or requested) to Unit4 that allows for Configuration of Unit4 IDS.

12.5 Technical overview

| Topic | Description |
|--------------|---|
| FTP | |
| Protocol | SFTP (SSH FTP) protocol is used with AES256-SHA2 cipher |
| Credentials | <p>Two sets of credentials are provided per environment (e.g. 2 username/passwords for production, 2 username/password for each NPE). Additional credentials can be requested against additional costs.</p> <p>Each set of credentials will provide access to a dedicated folder on the application server.</p> <p>Customers can create as many subfolders as they want, and there is no restriction about the naming of the subfolders, however Unit4 does not provide granular access management to subfolders.</p> |
| FTPS | |
| Protocol | FTPS Protocol |
| | FTPS can be used from Unit4 Financials as an output device master type. This requires set up of FTPS folder by the client. Unit4 Financials uses the protocol extension RFC 4217. |
| Email | |

| | |
|-------------------------------|--|
| Domain | Unit4 provides basic e-mail functionality for sending messages to recipients with default Unit4 domain, which on request can be configured with custom domain. In case the Customer requires more advanced features (e.g. bounce back emails, DKIM support, IMAP support), Unit4 products can use Customer's own email servers, if they are reachable by Unit4 SaaS. |
| Protocol | SMTP over TLS |
| Authentication | |
| Protocols supported | WS-Federation, SAML-P and OpenID Connect support (see Unit4 IDS Service Description) and application specific credentials |
| Internet communication | |
| Protocols supported | HTTPS secured with TLS with RSA SHA256withRSA encryption and/or EC SHA256 with ECDSA |

13. Data considerations

13.1 Transfers of Customer Data to Unit4 Financials SaaS

Unit4 deploys a standard architecture and therefore, where Customer is an existing Unit4 Customer, it is responsible for ensuring data consistency (i.e. that Customer Data to be inserted follows such standard architecture) and that any inconsistencies in Customer Data are appropriately cleansed before such data is inputted into the Unit4 Financials SaaS.

When Customer requests to copy a database snapshot from outside of Unit4 Cloud environment then it should be free of any Customisation objects. These objects should be sent in a separate Service request and will follow standard Customisation review process.

13.2 Backup and Service Restore

Customers are given the option of a "forgiveness" restore, where a recent Production Service back-up can be restored to the PE in case of a disastrous User mistake (e.g. running month end processing in "live environment" instead of in "preview" as intended).

Backups are performed to allow for forgiveness restores to be completed with a restoration point as shown below and no later than thirty (30) days prior to current time, to a resolution as shown below. Forgiveness restores are initiated within four (4) Business Hours after request and time to complete depends on data volume.

There is no "forgiveness" restore option for Unit4 People Platform Services.

Request restore point permitted

between 1 hour prior to the time the request is made and no later than 30 days prior to the time of request to a resolution of 5 minutes

Customer may request a Service Restore report no more frequently than once per month via the Unit4 Community4U using a Service Request. An arbitrary example is shown below:

| Current time | Restore Range | |
|------------------|------------------|------------------|
| 15-03-2017 00:15 | 13-02-2017 00:15 | 14-03-2017 23:15 |
| 25-07-2017 14:25 | 25-06-2017 14:25 | 25-07-2017 13:25 |
| 22-09-2017 08:00 | 23-08-2017 08:00 | 22-09-2017 07:00 |

13.3 Data Security

Data in transit

Customer Data in transit is protected with latest TLS encryption levels.

Customer Data at rest

The transparent data encryption and/or whole database encryption is used for Unit4 Financials SaaS shared model to protect Customer data at rest. In Unit4 Financials SaaS dedicated model transparent encryption and/or whole database encryption would be an additional offering, available against extra charge. More information can be found in Unit4 Information Security Policy at www.unit4.com/terms.

Whitelisting

IP whitelisting is offered as an option that will come at an additional recurring cost in the Unit4 Financials SaaS, as a means to gain an extended level of control on who has access to their environment. An IP whitelist is a list of IP addresses that are granted access to a certain Service. When an IP whitelist is used, all IP addresses are denied access, except those included in the IP whitelist.

IP whitelisting is available according to the table below.

| Whitelisting | Service | Data center | Cloud Type | Available? |
|---------------|-----------------------|-------------|------------|------------|
| Web endpoints | Unit4 Financials SaaS | Azure | All | Yes |

Customer needs to provide VPN access to their own network for partners or Unit4 consultants working off network (to allow remote working).

The People Platform Services like Unit4 Identity Services, Unit4 Wanda and Unit4 Extension Kit use dynamic IP addresses, there for IP whitelisting is not supported for any combination of Unit4 Financials SaaS with any People Platform Services.

13.4 Limits and regulators on usage

Unit4 runs in a Multi-Tenant environment and, as such, Unit4 observes fair use limits so that runaway processes do not monopolize shared resources. When a limit is exceeded, corrective measures will be taken.

For actual usage limits please see Fair Usage Policy at www.unit4.com/terms.

13.5 Access to my data

The Customer's Data is owned and controlled by the Customer and in accordance with Applicable Law, Customer shall be the data controller. Unit4 is the data processor.

To ensure the Customer has access to their Customer Data, the following options are available:

- Unit4 Financials (web-client), accessed via a supported web browser exclusive to VPN, or available from both Internet and VPN. ITK interfaces accessed at run-time through ITK Web User Interface (Command Centre);
- Application functionality (e.g. Web Client, Mobile Apps);
- Application reporting tools;
- Application functionality to export to file;
- Programmatic access to Unit4 Financials API/web services;
- Direct database access to copy of production data via TCP/IP TDS endpoint (see Direct database access);
- SFTP access: Exclusive to Internet or available from both Internet and VPN;
- Printing directly from Unit4 Financials can be achieved using an Internet Printing Protocol (IPP) printer over the Internet;
- Upon Agreement termination Customer Data can be retrieved by Customer in accordance with the Agreement.

13.6 Download copy of Production Database

Unit4 can export your Cloud Production Environment Database to a Unit4 controlled Azure storage location on a weekly basis as an additional Service against extra recurring costs. The export will be in a format usable with the latest version of Microsoft SQL Server. The Customer can manually download this export from this location. Each export will be retained for four (4) weeks. Please note that this additional Service is not available for Unit4 People platform Services.

Customer responsibilities for this additional Service offering include:

- Customer access responsibility – control who has permission to download the export;
- Ensuring data privacy during and after download;
- Establishing, monitoring and managing the download process;
- Restoring or importing the export once downloaded;
- Licensing, operating and installing in the Customer's IT infrastructure any applications that will be used in the retrieval process and subsequent use of the export.

SCHEDULE A

Glossary and Technical Acronyms

Unless defined in the tables below, capitalised words and phrases have the meaning given to them in Unit4's General Terms of Business or Unit4 Support Terms (found on www.unit4.com/terms).

| | |
|------------------------------|---|
| Account Administrator | an appropriate and qualified Business User who will have administrative level control for creation, maintenance and deletion of Accounts providing access to the Unit4 Product. |
| Localisation | a Unit4 Product developed for strategic territories and verticals that secures legal, statutory and market standard requirements in that territory or vertical. |
| Multi-Tenant | a single instance of Unit4 SaaS including its supporting infrastructure which serves multiple Customers. |
| Service Restore | the time it takes Unit4 to perform the restoration of a recent Production Environment back-up (at the request of the Customer). |
| Transaction | the creation or modification of a Record. |

| | |
|------------------|---|
| ADFS | Active Directory Federation Services |
| AES | Advanced Encryption Standard |
| API | Application Program Interface (e.g. web services) |
| FTP | File Transfer Protocol |
| HTTPS | Hypertext Transfer Protocol Secure |
| IdP | Identity Provider |
| Kbps | Kilobits Per Second |
| NPE | Non-Production Environment |
| PCI DSS | Payment Card Industry – Data Security Standard |
| PE | Production Environment |
| SFTP | Secure File Transfer Protocol |
| SHA-2 RSA | Secure Hash Algorithm (number 2) and RSA encryption Algorithm |
| SLA | Service Level Agreement |
| SQL | Structured Query Language |
| TLS | Transport Layer Security Encryption |
| URL | Uniform Resource Locator (a web address) |
| VPN | Virtual Private Network |
| WIP | Work In Progress |
