Why move to Unit4 ERPx?

How ERPx can help boost the agility and resilience of your organization

What is ERPx?

ERPx is a next-generation ERP solution built and delivered on Unit4's People Platform. It is the next evolution of Unit4 in the cloud.

ERPx is a fully web-based, cloud-native SaaS solution. As with all versions of Unit4 ERP, ERPx continues to provide flexible ERP capabilities that are purpose built for service-centric organizations —now brought to you on our native cloud microservices architecture so you can **adapt, scale and innovate at a much faster rate.**

Unit4 ERPx – Right for your Business

By combining the maturity and depth of our people-centric ERP solutions onto an industry-leading cloud platform, we've built finance and HR solutions that will help you lead your organization into the digital age.

Capabilities for your industry - continued focus on your industry, region and size.

User experience for all users - powerful for pros, lightweight for everyone, automated whenever possible, and accessible across multiple devices.

Modern cloud platform - for enhanced performance and agility, easier extension to external data, ability to build your own apps or use an expanding community of contributors.

> **"ERPx ticks a lot of boxes in terms of what a modern platform should look like: a user-centric design, a cloud native and microservices-based architecture, and potential to extend through low/no code development."**

Nick Mayes
Research Director, teknowlogy Group, Unit4 launches "last ERP you'll ever need"

"Unit4 has also evolved the product with more innovation such as machine learning, utilized to help with actionable recommendations and completion of manual tasks with touchless experiences."

Mickey North-Rizza
Program Vice President, Enterprise Applications and Digital Commerce, IDC,
IDC Link: Unit4 Announces ERPx, a Modern and Modular ERP System

Benefits of moving to ERPx

Survive and thrive in a turbulent market – increase agility and extend your ERP

- Enable easy integrations and extensions with external applications to connect to the outside world and extend the power of your ERP.

- Retain your ability to change and modify your ERP as needed with a fully integrated data model, processing model, and reporting model. Make changes on the fly to meet your business needs.

Don't get left behind – have immediate access to new features and functions

- Utilize the latest technology, such as AI, to improve business processes without expensive upgrade projects.

- See a faster ROI with quicker deployment of new capabilities and easier onboarding of new users.

- Benefit from a community of partners working on continuous improvements to ways of working.

- Easier to maintain and update with a single source of truth for your data.

Retain valuable talent – Improve your people experience with enhanced tools

- Provide a consistent user experience with a fully web-based working environment (no more desktop or Citrix).

- Simpler to use through instant and mobile apps to give easier and quicker access whenever needed.

- Tighter integration to the way you work with links to communication tools such as Teams or Slack.

- Smart automation tools to to help alleviate the administrative burden.

Boost your margins – see a reduced total cost of ownership

- No desktop running costs, Citrix license costs or user training.

- No expensive implementation projects to get new features or make changes.

- Lowered IT maintenance costs through better external integration.

Gain all these advantages without the risk – and build on your current investments

- Rather than starting from scratch, ERPx is an evolution of your existing product's architecture, making it easier and quicker to realize value.

- Industry-leading security and compliance through Microsoft Azure capabilities and automation.

- No need to retrain as software is already familiar, but with added enhancements.

What's special about the Unit4 platform?

- **Built on Microsoft Azure –** hyper-scales on demand and benefits from Microsoft's significant investments in analytics, virtual computing, storage, security, machine learning, and artificial intelligence.

- **Cloud-native microservice architecture -** our multitenant system can change and grow flexibly. Make updates and changes with ease.

- **Easy integration and extension -** adding or extending functionality and integrating with other external systems will be dramatically easier and faster.

What functions are available in ERPx?

Finance

General Ledger, Accounts Payable and Supplier Management, Accounts Receivable and Customer Management, Fixed Assets, Statement Processing, Sales Order Processing, Smart Invoice Processing Services, and Compliance.

Project Lifecycle
