

Unit4's Escrow Policy

This policy only applies to a Unit4 Customer who has an agreement with Unit4 for Unit4 Software on a long-term licence or subscription basis. This policy does not apply to Unit4 SaaS.

For the benefit of its Unit4 Software customers, Unit4 has established a suite of escrow agreements with the Escrow Providers (as identified below) (the “**Escrow Agreements**”):

Pursuant to the Escrow Agreements, Unit4 has and will continue to place in escrow the then-current source code versions of the Unit4 Software, together with any associated materials (the “**Escrow Materials**”). The Escrow Materials are updated regularly.

If Customer wishes to be named as a beneficiary to any such Escrow Agreement, then Customer must enter into the appropriate agreement with the Escrow Provider and pay the then-current annual fees. Upon a qualifying trigger event (as defined in the applicable Escrow Agreement) (“**Trigger Event**”), Customer will be entitled to the relevant Escrow Materials for the Unit4 Software, subject to the terms of the agreement between Unit4 and Customer, this Escrow Policy and the terms of the applicable Escrow Agreement. Any release of the Escrow Materials shall not (i) relieve Customer of any obligations, including but not limited to payment terms, under the agreement between Customer and Unit4 or (ii) be deemed to expand the scope of use or license grant in any way.
