Your Journey to the Unit4 FP&A Cloud

Learn more about the Unit4 FP&A Cloud Migration Assessment and how it works

When you start your journey to the Cloud, we want to make sure this is a smooth transition, with complete transparency and no surprises along the way.

That's why we start the process with a **Cloud Migration Assessment**, giving you full insight into your current solution environment and helping you find the best way for you to make the move over to Cloud.

What is the Cloud Migration Assessment?

The Cloud Migration Assessment is a streamlined and collaborative evaluation process where we analyze your Unit4 FP&A system to understand your setup and workflow.

Based on this assessment, we can build a migration proposal with a roadmap for a successful transition to the Unit4 cloud.

This process will not only help accelerate your migration over to the Cloud, so you can quickly benefit from the latest Unit4 innovations but will also let you know how long it will take to get your Cloud solution up and running.

Through the Cloud Migration Assessment, we can:

- Understand the shape of your unique operations, and how we can help adapt to them.
- Create a transparent roadmap for migration success.

Discover why moving to the cloud has never been easier

In business for people

How does the Cloud Migration Assessment work?

To set the initial scope, we start by reviewing your existing processes and understanding your main business drivers. We look at available contract information but also reach out to you to discuss any specific requirements and unique objectives your organization may have.

As a next step, we will work with you to fill out a cloud assessment questionnaire to better understand your unique processes and the usage of your system, including:

- Number and types of interfaces.
- Currently used database and its version.
- Number of FP&A models.
- Number of users in your system.
- Currently used hardware for the application server and database.
- Currently used authentication method with FP&A.

Based on this, we are able to evaluate your readiness to move to Cloud and a **migration proposal** with recommendations.

And that's it! We are now ready to start your journey by signing a solution agreement and preparing your organization for onboarding.

An onboarding plan that works for you

Based on the assessment, we can map out your entire journey to the Cloud and provide you with a clear onboarding plan that fits the specific needs of your organization.
