

# The right data at the right time drives project success

Motiva provides the public sector, businesses and consumers with professional services that increase resource efficiency and promote the efficient and sustainable use of energy and materials.

## The Challenge

Motiva is undergoing a major digital transformation. As a provider of professional services, the company needed real-time, accurate information to improve the effectiveness and outcomes of its projects.

## Achievements

### Automated everything

Purchase invoice processing, AP transitions, timesheets, payroll and more require little intervention. Accurate and speedy.

### Real-time info a click away

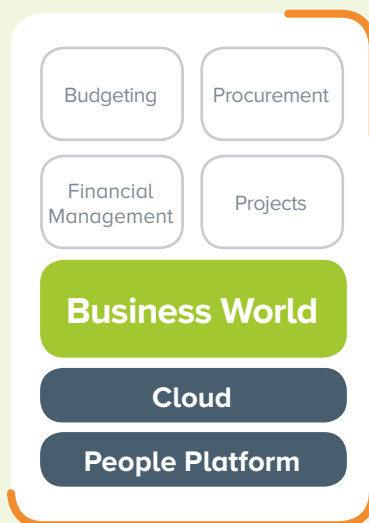

Constantly updated business information provides utmost transparency and keeps management's finger on the pulse of the business.

### Better project outcomes

A clear view of project invoices, costs, hours, and project staff availability enables fast juggling. Resource management is straightforward.

## How did Unit4 help?

- Comprehensive system with integrated financial and project data.
- Automated workflows.
- Always-available support that understands Motiva's operations.
- Deep capabilities for project management, project budgeting, and reporting.

## Impacts

Significant time savings for administration, more time for higher value work

Improved business agility based on real-time data

**66%**

Faster access to percent-of-completion data

“As a financial manager I am probably the happiest about the benefits brought along by the new system. With Unit4, we receive constantly updated business information. In addition, we keep our finger on the pulse far more than we used to.”

Minna Malkki, CFO
