

Spend Analytics Lite for Unit4 Financials by Coda

Spend Analytics Lite brings business intelligence dashboards to Unit4 Financials by Coda to give you the data you need to understand historical and current spend and help you accurately forecast for the future. It empowers managers to make data-driven business decisions. Discover opportunities for savings and improvements. Mitigate risks through instant visibility. And eradicate manual data preparation with artificial intelligence.

Spend Analytics Lite can be integrated into Unit4 Financials by Coda in about **10 days**. It's a **cloud-only option**, and a cloud environment is a pre-requisite for setup.

Digitalization drives business strategy

With greater analytics insights CPOs gain a deeper understanding of their supply chains and, as a result, take on

increasingly strategic roles in support of the overall business strategy.

As simple as it should be

With Spend Analytics Lite, anyone can analyze spend data. No programming, just insights.

Unit4 Spend Analytics Lite by Scanmarket is a cloud-based software that provides clear visibility of company-wide spend data. Accurate, real-time insights help identify opportunities for efficiencies, and risk mitigation; elevating procurement to deliver meaningful strategic business impact.

Simplicity starts with visibility

Spend Analytics Lite identifies opportunities for savings and supplier dependencies while mitigating risk through instant visibility to company-wide spend.

AI-driven data cleansing and categorization

Increase data accuracy and eradicate manual data preparation through automated AI, machine learning and rules-driven technology.

Single source of all spend

Gain an accurate, and homogenized overview of spend across all data sources, business units, geographies, languages, and currencies.

Identify opportunities for savings and efficiencies

Analyze your data across standard and custom dashboards to easily identify opportunities for savings and efficiencies, all while being alerted to compliance and supply risks.

Maverick Spend - the elephant in the room

Maverick purchasing is hard to track, and the source of potentially huge losses in efficiencies and resources. It represents 1- 2.5% or more of an organization's total purchases – meaning if your yearly purchases equate to \$1 billion, 1% translates into \$10 million in unmanaged maverick spend.

“
We let data drive discussions with the business.”

Every data point is a learning opportunity

Connect, explore, and visualize your data in minutes.

Keep maverick spend in check

Cross-business visibility empowers you to stay in control of non-budgeted spend, foster a healthy balance of suppliers – and reduce the ever-growing tail spend.

Increase category intel

Optimize use of suppliers by mapping spend & payment terms per supplier, identifying direct or indirect spend risks.

Instant visibility

Online reporting provides a current view of the business, driven by the ability to update your spend when you need it – daily, weekly, or monthly.

Spend reporting

Get regular reporting and trend lines on spend identifying e.g., how spend is used across the business, if it is increasing or decreasing, the number of active suppliers and whether payment terms are correct.

Spend Analytics Lite Package

- Access to Unit4 Spend Analytics Lite
- Up to 10 users (additional users can be purchased)
- Data from Unit4 Financials by Coda only
