

Volvo Dealers' Association replaces its business system with Unit4

After 20 years with the same business system, the Volvo Dealers' Association needed to make a change. Their choice - Unit4 ERP

Why Unit4?

The Volvo Dealers' Association, which consists of around 50 car dealerships, was looking for a cost-effective finance system that could support their current business while being flexible and adaptable to future business needs.

One of the overall goals was to move to a technically modern and future-proof platform with an open architecture, making it easier to integrate with other systems.

The result

Unit4 ERP will provide a new future-proof platform that will support the members of the Volvo Dealers' Association with a standardized system for financial management.

"We have evaluated that with Unit4, we will get a system that will both support our financial processes and offer a great user experience," Tomas Svensson, Volvo Dealers' Association.

The Volvo Dealers' Association was established in 1953 and represents the interests of approximately 50 Swedish dealerships of Volvo cars, trucks, and buses, as well as Renault and Dacia passenger cars and transport vehicles. The association also owns Tanka i Sverige AB, which licenses fuel and car wash concepts (Tanka och Tvätta). Together with Volvo Cars, the association is also a co-owner of Volvofinans Bank AB and VH System AB (Tacdis).

"We wanted more efficient and automated customer and supplier interfaces and a higher level of process automation. Scalability was also an important factor; the platform needed to fit both small and large businesses in terms of price, functionality, and performance."

Tomas Svensson from the Volvo Dealers' Association
