We're making ERP a whole lot easier

Unit4 ERPx takes care of business so you can focus on your clients

Our ERPx platform is specifically designed for service-based organizations, empowering you to manage people, projects, and resources with ease. Built with adaptability and scalability in mind, ERPx grows with your business, simplifying complexity and keeping costs under control.

- Reduce administrative overhead for core processes such as payroll
- Manage client engagements, billing, resource optimization and profitability with ease
- Empower your team to collaborate effectively with intuitive tools and real-time insights

Trusted by more than 5,100 service-centric businesses worldwide

Unit4 ERPx meets the needs of professional services firms, nonprofits, and other people-focused organizations by providing tailored solutions backed by over 40 years of industry expertise.

Purpose-built for service-led success

We understand the specific challenges service-centric organizations face, from increasing competition and shifting client expectations to global talent shortages and regulatory demands. ERPx is crafted to address these needs, supporting your people to deliver service excellence.

A solution that grows with your business

Unit4 ERPx is built with scalability at its core, allowing you to seamlessly add users, locations, and capabilities as your organization evolves. Our low-code/no-code tools make it easy to customize workflows and empowering even non-technical users to adapt without unnecessary complexity.

Efficient, intuitive, and future-forward

With a user-friendly interface, ERPx has a simpler learning curve compared to ERP systems originally built for product-based businesses, ensuring your team can hit the ground running. Seamless integration with tools like Office 365 and Teams enhances collaboration and productivity without adding complexity.

Cost efficiency, without cutting corners

Switching systems can be costly, but ERPx offers a future-ready solution with a lower total cost of ownership. By reducing reliance on third-party integrators and offering pre-configured industry templates, we help you save time and resources while staying focused on growth.
