

# Embark on the upgrade journey to redefine your business

## WHY upgrade your Unit4 solution?

If organizations are afraid that upgrades will disrupt the business, they should consider the positive side of the upgrade path.

Aberdeen's research finds that SMEs that are on the latest version of their ERP software report greater benefits as a result of their solution in a variety of key performance indicators, when compared to organizations on older versions.

Table 1: Upgraded users report benefits.

Benefits Achieved through ERP	Latest Version	Not on Latest
Reduction in operational costs	15%	9%
Reduction in administrative costs	12%	8%
Improvement in cycle time of key business processes	17%	14%

## WHAT are the reasons for upgrading?

By keeping their ERP solutions current, SMEs can stay on the upgrade path to success.

Table 2: Reasons to upgrade.

## HOW to get the benefits?

By comparison, SMEs that are implemented on the most recent version of their ERP software to those on older versions, it becomes clear that upgrades lead to more functional, usable and scalable solutions.
