

THE JOURNEY TO CLOUD

Your entire Cloud migration journey and the different steps to get you up and running in the Cloud.

A high-speed journey to the Cloud

A fixed migration fee and clear timeframes

A transition process with minimal disruption

A clear project overview with full transparency

STEP 1: ENGAGE

Defining your business drivers

Before starting off, we look at available information we have about your organization, and set the initial scope of your migration project.

Cloud migration assessment

We start your Cloud journey with a Cloud Migration Assessment to evaluate your readiness to move to Cloud, and create a migration proposal with next steps.

By doing this, we are able to give you full insight into your current solution environment and help you find the best way for you to make the move over to Cloud.

[More information in the factsheet >>>](#)

Running the Unit4 assessment tool to find details of current usage, including but not limited to:

- overview of transactions and intensity
- number and types of customizations
- number and types of interfaces
- number of users
- processes for non-standard functionality
- most commonly used screen views

Solution Agreement

Once we complete the assessment, we will provide you with a clear onboarding plan that includes an upfront fixed fee and clear timeframes for the whole migration project.

STEP 2: ONBOARDING TO CLOUD

Plan and prepare

Kick-off meeting | Creating your future Cloud platform | Prepare for migration

Transform

1. Cloud Transformation

- ✓ Conversion and upgrade of database to target release
- ✓ Upgrade of the application

2. Migrating your solution

- ✓ Compliancy check
- ✓ Uplift customizations
- ✓ Code review & database upload

4. Validation & approval

- ✓ Cutover support & document archive migration

3. User acceptance test

- ✓ Testing your updated Business World system & making sure business critical processes are running as expected.

Deploy

(Going live)

STEP 3: BUSINESS AS USUAL

After you go live, you will receive ongoing support by Customer Success Manager.
