400 employees

Unit4 Business World

## From vigorous growth to market leadership

### The Challenge

After a period of rapid growth to become the market leader in Norway, Adecco needed to improve processes and get a better view of business data. In addition, regular acquisitions, mergers and reorganizations required agility and scalability.

### Achievements

#### Nimble operations

Adecco can rapidly adapt to new strategies, mergers and acquisitions. They are not constrained by old routines and processes.

#### Managing at the top

Tight operations and more robust data ensures solid performance as market leader. Managers have accurate information to make better informed decisions.

#### Alignment and insight

Common understanding throughout the business of what drives growth and earnings. Management has full control over the company's development.

### How did Unit4 help?

- Business World provides a accurate and well-organized view of business data
- Scalable functionality that fits together across finance, salaries, invoicing, and project management
- Flexible reporting solution
- Easy change management with system configurations handled by users
